PROFESSIONAL SUMMARY

Web developer coding since 2022, with hands-on experience delivering real projects for clients in the hospitality and tourism industry. Specialized in building corporate websites with Next.js, React and Astro, with a strong focus on performance, SEO and user experience. I have led projects end-to-end: from architecture and front-end and back-end development to Linux infrastructure management and digital strategy. Currently pursuing an Associate Degree in Programming at UTN (National Technological University).

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer • Ayres Dorados Lodge

Oct 2025 – Present

Sierra Grande, Argentina

- Built the corporate website (ayresdorados.com) with Astro and React, achieving high performance and SEO optimization from launch.
- Developed an internal booking system for front-desk staff, synced in real time with Google Sheets, eliminating manual processes.
- Built a voucher generator that automates the creation of PDF documents from data entered into the system.
- Managed version control and code maintenance with Git/GitHub.

Full-Stack Web Developer & Digital Management • Ayres de Calafate

Jan 2025 – Present

El Calafate, Argentina

- Designed and built the corporate website (ayresdecalafate.com) from scratch, first in React + Vite and later fully migrated to Next.js 15 with App Router, raising the Lighthouse score from 40 to 100.
- Implemented internationalization in three languages (ES/EN/PT) with next-intl, a modular architecture with CSS Modules, and a booking engine integration with a custom interactive date and guest picker.
- Set up and managed a Debian server, domain and corporate email system, ensuring 24/7 availability.
- Implemented contact automations (forms, WhatsApp) focused on converting visits into bookings.

Web Developer & Digital Management • Altos del Iguazú Hotel

Sep 2024 – Oct 2025

Puerto Iguazú, Argentina

- Designed and developed the hotel website with a focus on UX/UI and accessibility.
- Migrated the site to a dedicated Linux server, optimizing infrastructure and load times.
- Configured the corporate email system and integrated the contact form backend.
- Developed automation scripts for quick-access links (WhatsApp/social media) and key site features.

Community Manager • South American Group

Feb 2023 – Jul 2023

Posadas, Argentina

- Analyzed metrics (engagement, reach, followers) in Excel to produce weekly performance reports.
- Optimized content based on trends and results to increase brand visibility.

FEATURED PROJECTS

aiBrief | AI-powered branding assistant • Next.js 16 • React 19 • TypeScript • Tailwind • Node.js • MySQL • FLUX • Puppeteer

Full-stack web application that automates the creation of brand identity briefs using AI (color palette, typography, user persona) with asynchronous visual generation of logos and mockups via FLUX. Includes a natural-language refinement chat and PDF export that matches the on-screen design, built with Handlebars and Puppeteer.

<https://www.briefassist.site/>

Simplicity Systems | Internal tools • [Astro SSR](#) • [React 19](#) • [React-PDF](#) • [Google Sheets](#) • [Apps Script](#)

Suite of internal tools in production for the Ayres Dorados front desk. Manages bookings, syncs availability in real time with Google Sheets (a serverless database with a Google Apps Script webhook) and generates PDF vouchers in the browser with [@react-pdf/renderer](#) at zero infrastructure cost.

Project Snow | FiveM Server & Official Website • [Lua](#) • [FiveM](#) • [QBCore](#) • [ox_lib](#) • [Next.js 16](#) • [Tailwind](#) • [discord.js](#) • [Playwright](#)

Post-apocalyptic survival roleplay server built on QBCore with 16 custom Lua scripts (weather, body temperature, staged diseases and network-synced meteor events). Includes an official website in Next.js 16 with Tailwind, a Discord bot built with discord.js, and automated performance audits with Playwright and Lighthouse.
